

two_mobile_noiseless Turtlebot 1 Report

Matthew Swartwout

August 10, 2016

This is a summary of the data from the two_mobile_noiseless experiment, Turtlebot #1.

The runtime of this experiment was 0 hours, 6 minutes, and 53.6 seconds.

The total number of external pose measurements received by the robot during this time was 1173 which means poses were received at an average of 2.8360735 poses per second.

Shown below is the summary of each filter's error for both x and y coordinates, and also the error in total distance.
