

# five\_mobile\_noisy\_false Turtlebot 5 Report

Matthew Swartwout

July 13, 2016

This is a summary of the data from the five\_mobile\_noisy\_false experiment, Turtlebot #5.

The runtime of this experiment was 1 hours, 8 minutes, and 18.1 seconds.

The total number of external pose measurements received by the robot during this time was 18677 which means poses were received at an average of 4.5574779 poses per second.

Shown below is the summary of each filter's error for both x and y coordinates, and also the error in total distance.
